

FROM MS PAINT SKETCH TO THE ULTIMATE MAN CAVE

Four simple steps to turn a rough idea into a clear visual concept.

START HERE

Sketch the idea

01

A rough MS Paint drawing is enough. Add overall sizes, doors, windows and important materials or features.

SIMPLE INPUT • CLEAR INTENT

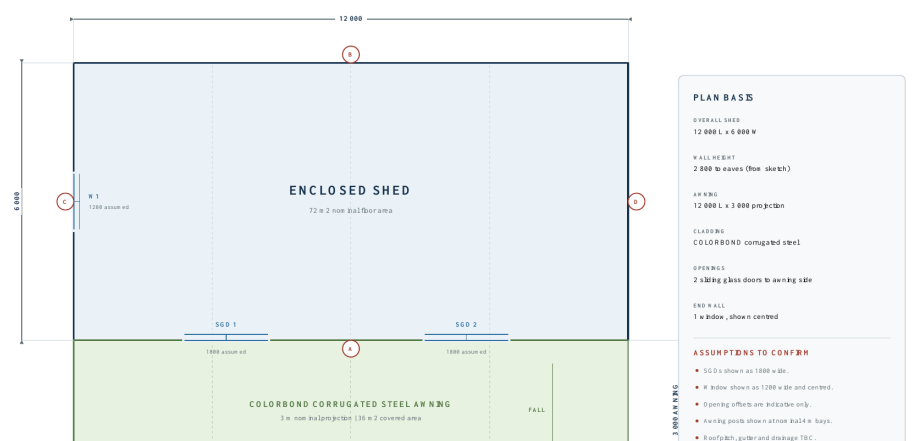

ASK AI

Create the plan

“Take a look at my sketch and produce a plan layout please.”

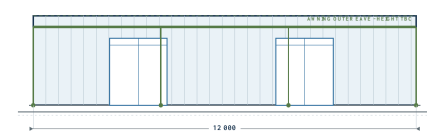

Check the dimensions, openings and assumptions before moving on.

02

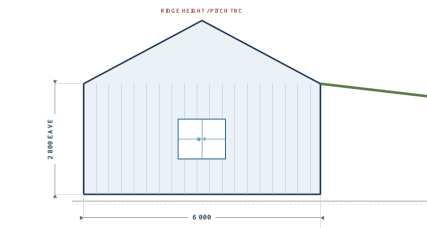

ARCHITECTURAL ELEVATION

Two elevation views (front and side) showing the shed's profile and dimensions.

LEFT GABLE-END ELEVATION

Left gable-end elevation showing the shed's profile and dimensions.

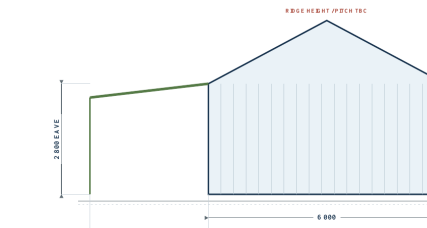

REAR ELEVATION

Rear elevation showing the shed's profile and dimensions.

RIGHT GABLE-END ELEVATION

Right gable-end elevation showing the shed's profile and dimensions.

BUILD THE PICTURE

Add four elevations

03

“Can you also include the four side elevations?”

This reveals the roof form, awning, doors and windows from every side.

BRING IT TO LIFE

Visualise the result

“Create a 3D architectural render...”

Describe the site, Woodland Grey COLORBOND®, gum trees, lawn, clouds and natural shadows.

04
